

# CENTRO C10 PRO BLUETOOTH MODULE

# INSTRUCTIONS

Thank you for purchasing this Centro RC Bluetooth® Module. Before use, please read this manual carefully taking note of its usage conditions and technical parameters.

## INTRODUCTION:

This product uses Bluetooth® technology to establish a connection between the ESC and mobile device. By installing the ESC1 mobile application, the user can monitor the ESC's data in real time, set the ESC's parameters and upgrade its firmware.

## COMPATIBILITY:

1. Centro C10 Pro Competition

## CONNECTION:

The Bluetooth® module connects directly to the ESC via the 3-pin socket located next to its integrated power button.

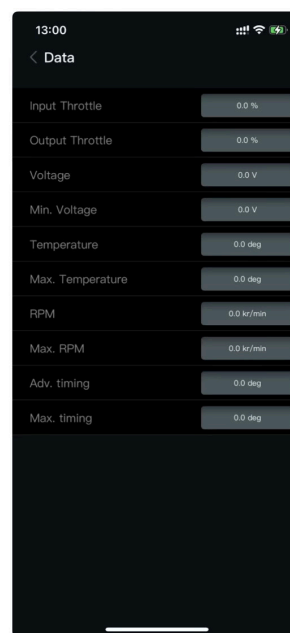

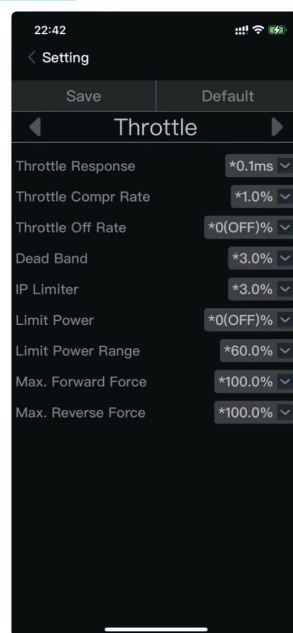

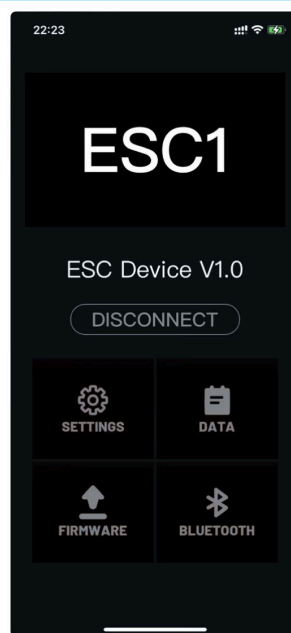

## ESC1 APPLICATION DOWNLOAD INSTRUCTIONS:

### ANDROID VERSION:

1. Download the ESC1 Android app. on the Google Play Store (coming soon).
2. When asked whether ESC1 can access the mobile device's Bluetooth®, choose 'Allow'. With Bluetooth® and location services enabled on the mobile device, select 'CONNECT' to wirelessly connect to the ESC via the attached Bluetooth® module.

### IPHONE VERSION:

1. Scan the QR code or search 'ESC1' in Apple's App Store to download and install the ESC1 mobile application.
2. When asked whether ESC1 can access the mobile device's Bluetooth®, choose 'Allow'. With Bluetooth® and location services enabled on the mobile device, select 'CONNECT' to wirelessly connect to the ESC via the attached Bluetooth® module.
