

- If the lithium battery is used incorrectly, there may be a danger of spontaneous combustion.
- Our company will not be responsible for all losses caused by incorrect use of lithium batteries.
- Because it is likely to cause an explosion or fire, it is strictly prohibited to use a charger other than the original charging cable to charge the lithium battery. It is strictly forbidden to disassemble, pump, burn, reverse the positive and negative poles of the battery, avoid metal objects and the positive and negative poles of the battery are in contact. It is strictly prohibited to pierce the battery with sharp objects to avoid the risk of battery fire.
- Please change the battery within the visible range. Never stay away from the battery that is being charged.
- To prevent injury, keep the battery out of the reach of children.
- Please do not charge a damaged lithium battery. It may cause battery expansion, deformation, explosion or fire.
- In order to protect the environment, damaged batteries should be properly disposed of in accordance with regional or national waste regulations, deal with.

Safe Usage Instructions for Li-ion

1. The battery must be charged with a dedicated USB charging cable.
2. The USB charging cable must be connected to a USB power adapter. If the lithium battery is used incorrectly, there is a high risk of spontaneous combustion.
3. Because the damaged lithium battery may ignite spontaneously, please do not charge it.
4. The battery must be charged according to the specified method.

Precautions Of Li-ion

7.4V 1200mAh Li-ion (Included) Intelligent USB charger lead (Included) Charging period: 2-4 hours Full charging state: green light always lit Red light always lit + Green light flashes Charged state: red light always lit Uncharged state: red light always lit TIME OF CHARGING: INDICATOR LIGHT STATUS AT THE TIME OF CHARGING: Battery specifications: 18650 7.4V 1200mAh Li-ion Intelligent USB balance charger with overcharge protection Input: 5V 2A Output: 7.4V === 1000mA	Connect the white port of Li-ion to USB charging port, as shown in the figure, and ensure port can be connected tightly and correctly, then insert the USB charging plug into power adapter, and perform charging.
--	---

BATTERY CHARGING INSTRUCTIONS

3. Install the battery cover, tighten the screw and twist the buckle back.(Fig. 3)

8+ AGES

PROFESSIONAL R/C LADDER FIRE TRUCK WITH 22 FUNCTIONS

USE MANUAL

FRONT WHEEL FINE TUNING

When the car cannot move in a straight line, it can be corrected by fine-tuning the front wheels.

CONTROL OF LIGHT AND SOUND

FREQUENCY PAIRING AND POWER ON OF REMOTE CONTROL

The product is remotely controlled with 2.4GHz frequency. For the first operation, the user must install the battery on the vehicle body and the remote control first.

then make sure to power on, turn on the power to pair the frequency automatically. When the indicator light of the remote control stops flashing, the vehicle will make a "tick" sound, that is, the frequency pairing is complete. If the vehicle does not respond to the remote control, the user can turn off the power of remote control and vehicle, turn on the power of remote control and vehicle again to match again (same steps as above).

① Power switch of vehicle body

② Power switch of remote control
